EDUCATION

Master of Computer Application (MCA) Vishwakarma University, Pune — 1st Year CGPA: 8.02	2025 – 2027 (Pursuing)
Bachelor of Science (B.Sc.) in Computer Science Savitribai Phule Pune University — CGPA: 7.72	2025
Higher Secondary Education (HSC) Vidyadham Jr. College of Science, Shirur — 58.00%	2022
Secondary Education (SSC) Vidyadham Prashala, Deodaithan — 80.20%	2020

EXPERIENCE

Software Development Engineer (Internship) — Bluestock Fintech (Remote), Pune	Mar 2026 – Apr 2026
- Collaborated with a cross-functional development team to build and enhance fintech applications in a remote, agile environment - Assisted in designing, developing, and testing software components for real-world financial systems, ensuring functional accuracy and reliability - Debugged and optimized application code, improving performance and reducing response latency across key modules - Gained hands-on exposure to the full Software Development Lifecycle (SDLC), including sprint planning, version control workflows, and agile practices - Actively participated in code reviews and technical discussions, contributing to improved code quality and team problem-solving - Tech/Tools used: JavaScript, React, Node.js, SQL, Git, GitHub	

PROJECTS

AgroMart – Online Agriculture E-Commerce Store

- Built a full-stack e-commerce platform for agricultural products (seeds, fertilizers, pesticides, tools) using the MERN stack (MongoDB, Express, React, Node.js)
- Implemented JWT-based authentication with bcrypt password hashing, role-based access control, and server-side stock/price validation for secure transactions
- Developed customer-facing features including product catalog with search/filters, persistent shopping cart, checkout flow, and order history, along with an admin dashboard for order management
- Deployed frontend on Vercel and backend on Render with a live, shareable demo
- Technologies used: React (Vite), Tailwind CSS, Node.js, Express.js, MongoDB

Blinkit Quick Commerce Analytics Dashboard

- Developed a full-stack analytics dashboard inspired by quick-commerce platforms, featuring 6 dedicated modules — Sales, Delivery, Customers, Products, Regional, and Inventory
- Built a complete REST API using Express.js with session-based authentication and SQLite (better-sqlite3) as the auto-seeded database backend
- Deployed the full application live on Render
- Technologies used: Node.js, Express.js, SQLite, JavaScript, HTML5, CSS3

Recruit AI – Resume Screening & Candidate Ranking System

- Built an AI-powered recruitment tool that analyzes uploaded resumes against job descriptions to automatically rank candidates by relevance and fit
- Designed a scoring engine using NLP-based parsing to match skills, experience, and keywords between resumes and job requirements
- Implemented a feedback module that generates personalized improvement suggestions to help candidates strengthen weak areas in their resume
- Technologies used: Python, spaCy, FastAPI, Pandas

TECHNICAL SKILLS

Languages: Java, Python, C++, C, JavaScript

Databases: MySQL, MongoDB, SQLite

Frameworks/Libraries: React, Node.js, Express.js, FastAPI, Tailwind CSS, Pandas

Tools: Git, GitHub, VS Code, Eclipse IDE

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Soft Skills: Project Management, Time Management, Teamwork, Leadership

CERTIFICATIONS

- Career Essentials in Generative AI by Microsoft and LinkedIn** — LinkedIn Learning & Microsoft
- Essentials of Cloud Computing** — Infosys Springboard
- Introduction to Generative AI Studio (Google Cloud)** — Simplilearn SkillUp
- Master Data Management for Beginners** — TCS iON
